

Frequently Asked Questions

What are the COVID-19 screening questions?

- Do you have any new symptoms of fever or chills, cough, shortness of breath, sneezing, sore throat, or fatigue?
- Have you tested positive for COVID-19 in the last 14-days?
- Have you been in contact with anyone that has tested positive for COVID-19?

Who is at High Risk for COVID-19?

- People 60 and older
- People with underlying health conditions including heart disease, respiratory illness, and diabetes
- People who have weakened immune systems
- People who are pregnant

What do I do if I think I may be feeling symptoms consistent with the Coronavirus or know with certainty that I have been exposed to a confirmed positive COVID-19 person?

- If you are exhibiting symptoms such as fever, new cough, and shortness of breath that you feel may be consistent with Coronavirus, we ask that you **DO NOT** show up at the hospital or Specialty Care clinic unannounced.
- Call Lake Chelan Hospital at 509-682-3300 to determine your course of care.
- If you have an emergency and need immediate medical attention, call 9-1-1 or go to the nearest emergency room.

Do I need to be tested for COVID-19? Healthcare providers may test any patient with symptoms consistent with COVID-19.
