

COVID-19 VACCINATION FOR CHILDREN 5-11

The Pfizer COVID-19 vaccine is now recommended for children as young as 5. Here are answers to common questions about COVID-19 vaccination for kids and tips for getting vaccinated.

PFIZER COVID-19 VACCINE FAST FACTS

Recommended for people ages 5 or older.

Patients receive two doses three weeks apart.

Children ages 5-11 receive a smaller dose than older patients.

Vaccination is available at **no cost**. Insurance is not required.

Common side effects

- Pain, redness, or swelling at injection site.
- Tiredness, headache, muscle pain, chills, fever, nausea.

Side effects are typically mild and go away within 1-2 days. More severe reactions have occurred but are very rare. Learn more at [cdc.gov/covid19](https://www.cdc.gov/covid19)
